| Historical Scenario                  | Description  | Stock<br>Market | Interest<br>Rates | Bond<br>Market | Commodity<br>Market |
|--------------------------------------|--|-----------------|-------------------|----------------|---------------------|
| 1994<br>US Rate Hike                 | In combating inflation, the US Federal Reserve raised rates from 3.25% in February to 5.5% in November 1994.                                       |                 |                   |                |                     |
| 2000-2003<br>Tech Crash & Recession  | Period of crisis and slowdown for technological firms due to a rapid jump<br>in stock prices when tech bubble began to burst.                      |                 |                   |                |                     |
| 2001<br>September 11th               | The US stock market was closed for a week upon a series of coordinated suicide attacks upon the US on September 11, 2001.                          |                 |                   |                |                     |
| 2008-2009<br>Global Financial Crisis | Major financial crisis starting with the failure of several US-based financial firms. Extended into 2009, when stock markets reached their lowest. |                 |                   |                |                     |
| 2010<br>European Bond Crisis         | During crisis, the liquidity access for peripheral countries was affected by budget deficits, high borrowing costs, and failing banking systems.   |                 |                   |                |                     |
| 2011<br>US Debt Ceiling Act          | Political deadlock on appropriate level of US government spending and its impacts. Debt and equity markets experienced significant volatility.     |                 |                   |                |                     |
| 2016<br>Brexit                       | The referendum by British voters to exit the European Union roiled global markets causing the pound to fall to its lowest level in decades.        |                 |                   |                |                     |
| 2020<br>COVID March Selloff          | Peak and Valley of the MSCI ACWI index when Covid became a Global Pandemic.  |                 |                   |                |                     |
| 2020<br>COVID Volatility Spike       | Period it took for the Cboe Volatility Index (VIX) to revert to pre-pandemic levels.   |                 |                   |                |                     |

## **Reference Guide**

#### **General Information**

**Overview and Purpose:** This report is delivered to the Board of Investments every quarter as a means of oversight; ensuring that asset category and investment manager activity align with established guidelines. It is a tool to monitor adherence, ensure transparency, and facilitate communication of investment and operational activities.

#### Methodology

• Data collected from multiple sources including: LACERA's custodian, MSCI BarraOne Risk platform, Investment Consultant and Manager reports.

#### Terms

- "Advisory" used throughout this report serves as a monitoring measure and does not always equate to a compliance breach or a violation. No advisory indicates there is nothing to share.
- "Asset Allocation Compliance" measures actual asset allocation versus investment policy target weights and ranges.
- "Program Guideline Compliance" assesses asset category level guidelines.
- "Investment Guideline Compliance" measures investment manager guideline compliance as established in investment manager agreements.
- "Economic Substitution Policy" LACERA policy on Iran, Sudan, Tobacco: Manager should refrain from purchasing securities when the same investment goals concerning risk, return, and and diversification can be achieved through the purchase of another security.
- For Investment Manager Meeting Requests, an "Advisory" is noted if the CEO or a Board member recommends staff to meet with a specific manager three or more times in a year.
  The purpose of notifying the activity is to promote transparency and governance best practices designed to preserve the integrity of the decision-making process.

Los Angeles County Employees Retirement Association

## A

### **ANNUAL RETURN**

The total return of a security over a specified period, expressed as an annual rate of interest.

## **ACTIVE RISK**

The expected standard deviation of the differential return between the portfolio and the benchmark. Active total risk arises from active management, and it is the result of active weights (deviations from the benchmark at the asset level) and therefore active exposures; for passively managed portfolios, it is referred to as "total tracking error."

## **ACTIVE RISK CONTRIBUTION**

Percent contribution to active total risk (or tracking error). The percent of active total risk that an individual asset or risk source contributes. For example, a % CR to Active Total Risk of 10% indicates that 10% of the portfolio's active total risk is arising from the active position in that particular asset.

## B

## **BASIS POINTS (BPS)**

One one-hundredth of one percent. One hundred basis points equal one percent.

### ΒΕΤΑ

A measure of the volatility of a stock relative to the overall market. A beta of less than one indicates lower risk than the market; a beta of more than one indicates higher risk than the market.

## D

## DURATION

A measure of the price sensitivity of a bond portfolio to changes in interest rates.

Los Angeles County Employees Retirement Association

## F

## **FUTURES CONTRACT**

Agreement to buy or sell a specific amount of a commodity or financial instrument at a particular price and a stipulated future date.

## Η

## HIGH YIELD BOND

A bond with a low investment quality and credit worthiness, usually with a rating of BB or less.

### **INFORMATION RATIO**

The excess return (alpha) per unit of active risk (tracking error).

# INTERNAL RATE OF RETURN (IRR)

A total rate of return that gives full weight to the size and timing of cash flows over the period measured and fully reflects unrealized gains and losses in addition to realized gains and losses, interest and dividend income.

Los Angeles County Employees Retirement Association

## Μ

## **MC TO TOTAL TRACKING ERROR**

This value represents the change in the active risk of an asset's portfolio or group that would result from a one percent increase in the asset's effective position plus an equal short position in the benchmark.

# S

## **SHARPE RATIO**

Average return earned in excess of the risk-free rate per unit of total risk.

## **STANDARD DEVIATION**

Statistical measure of the degree to which an individual value in a probability distribution tends to vary from the mean of the distribution. The greater the degree of dispersion, the greater the risk.

## TIME-WEIGHTED RETURN (TWR)

A measure of the compound rate of growth in a portfolio. Often used to compare the returns of investment managers because it eliminates the distorting effects on growth rates created by inflows and outflows of money.

## **TOTAL RISK**

The total (gross) risk to an asset (or portfolio), which is the standard deviation of the asset's total return distribution, expressed in percent. Total risk is forecasted using MSCI Barra's multiple factor models. The total risk for an asset depends on the asset's exposures to the risk factors, the factor variance/covariance matrix, and the forecast selection risk of the asset.

## **TOTAL RISK CONTRIBUTION**

The percent of total risk that an individual asset or risk source contributes. For example, a % CR to Total Risk of 10% indicates that 10% of the portfolio's total risk is arising from the portfolio's position in that particular asset.

Los Angeles County Employees Retirement Association

## Y

### YIELD TO MATURITY

The return a bond earns on the price at which it was purchased if it were held to maturity. It assumes that coupon payments can be reinvested at the yield to maturity.
